Core Competencies

DK Systems has been partnering with organizations to increase the efficiency and security of their networks while ensuring compliance with necessary regulatory/industry requirements.

We provide small to medium-sized businesses with effective solutions for cybersecurity, IT services, and IT security designed to protect data so they can focus on their core business growth and sustainability.

To begin we offer a comprehensive security assessment of both the internal and external network(s). Then DK Systems creates a plan and meets with the customer to show what is wrong and how to improve their security posture.

Solutions may vary, but all center around securing the perimeter, training employees, and securing the internal network. Our plan includes current best practices in the IT field and our security solutions provide threat remediation and secure architecture and design.

We offer five levels of customized IT services to meet your needs:
1. Assess and remediate
2. Train end-users and other stakeholders
3. Ensure data is secure and available
4. Plan, create, and design Network and Cyber solutions
5. Monitor the environment

Differentiators

1. Proven integrity in every aspect of our service.
2. Maintains industry security certifications
3. A trusted source for helping organizations improve their IT security and infrastructure
4. Presented presentations at professional security conferences
5. Trainer has taught adult IT courses at various colleges
6. Continually train and research IT security topics to keep to maintain industry certifications
